

IMPACT: LIVES SAVED

Photo credit: spokesman.com

To Honor those killed and wounded in the line of duty during the July 2016 ambush shootings – the worst single act of violence against law enforcement officers in U.S. history, the first 200 bullet proof vests produced will be donated to the Tulsa and Broken Arrow Police Departments as well as other local law enforcement agencies.

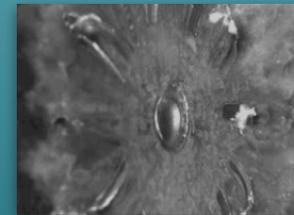

Your investment will provide the capital needed to build the equipment necessary to produce this life-saving material and products.

ACD TECHNOLOGIES

Committed to Creating a Safer Tomorrow!

**Help us achieve this incredible
ground-breaking technological
innovation in safety for all
those who put their lives on the
line to protect us.**

ACD Technologies was founded to offer tools for those who put their lives on the line every day to protect us.

Our partner, Dale Adams, President of Prima Materia Inc, developed ground-breaking technology which allows Sintering Silicon Carbide (SiC), a lightweight intrinsically strong ceramic, to be inexpensively cast and shaped into bullet proof body armor. SiC is one of the hardest materials in existence and will vaporize most projectiles and small arms fire upon impact. But until now it has been impossible to manufacture it into any but the simplest of shapes. Adams' new proprietary process is capable of sintering castings into complex shapes, including hollow and even covered hollow pieces.

Body armor construction is composed of two pieces of SiC that are 0.125" thick, sandwiches a tough proprietary midsection that is 0.125" thick and maintains a 300,000 PSI tensile strength. This method allows for three-dimensional free-form shapes that can follow all body contours for maximum protection.

Do you want to help change the world?

How about creating a safer tomorrow for our police, military and law enforcement professionals?

Help us make this a reality for those who put their lives on the line for our security!

Your investment will provide the capital to build equipment that will produce the initial prototypes for both bullet-proof vests and body armor.

For each investment of \$50,000 or more you will receive a percentage share in ACD Technologies plus a percentage share in Dale Adams, Prima Materia Inc.

Example: \$50,000 investment = 28,410 shares (2.85%)
ACD Technologies
PLUS
.7% percentage share
valued at \$20,833
Prima Materia Inc.
